
Step 7 Micro Win V4.0 Sp6 Download

Dear everyone! I just installed STEP7-MicroWIN V4.0 SP6 on a new Vista machine and it works fine. To ensure compatibility, I download Step 7 Microwin V4. iso for Windows XP SP2 and installed it on an old Windows XP computer. I tried running the Step7 MicroWin V4.iso for Windows XP to use it. However, Step 7 MicroWin V4.iso for Windows XP failed to initialize. I don't see any errors, but it can't load the program. It gives this message: Step 7 MicroWIN V4 .iso for Windows XP could not be loaded. The specified file cannot be found. When trying to download the program from the internet, it just says it can't find the file.
