CS4 is an essential Adobe Photoshop tool which is used by professionals to design graphics, websites, publications and other media. But when you think Photoshop, you may think of the common Photoshop features, like the tools, the brushes, etc. After getting used to them, they are very important to you and you want to get the best of them. If you own a Mac computer, then you must have heard of a program called Pixelmator. Pixelmator is another great graphic design tool from Mac, offering all the best Photoshop features and also some unique Pixelmator features to make a difference. This is a very powerful and

What's New in the The Moonrise?

This theme consists of several sub-themes. Among them are Moon Over Hebrides, Crescent Moon, Sand Beach at Moonlight, Blue Moon and Moonlight. You can also open the Moonrise sub-themes in a new window. Credits: Moonrise is a beautiful work of art from Maxim Romashov, his work can be found on Deviantart, RedBubble and Picarto. He is a nice guy who loves to draw and create beautiful artworks. He deserves to be known.

Moonrise is a little small on memory but in fact, I think it is a very beautiful piece of art. Thanks for sharing. Yeah Moonrise - one of the best apps I have seen and used. It even has a sound app if you'd like that as well. What are your thoughts on theme mixing? Like, I'd love to have crescent moon, sun, and waves... how would that work out? Thanks! Posts: 487 Re: New - Moonrise That's an awesome app. But as Brent said, where are the waves? In the background. And the moon only goes part way up. It's almost as if it's in the opposite direction, the moon should be rising towards the right. @Cristina |J.R.| - thanks so much for the kind words about the app. I love doing this kind of thing, so I'm glad to hear I've managed to make something that you can find useful. You are right about the waves, they are there

though they are not very prominent
- they are really white/blanched
white waves. That would be a really
great feature to have, I'll add that as
a suggestion. @Chesterman - thanks
for the comment! If you are using
the original app then it is, indeed, a
very small memory thing, but it's
worth the look if you like this kind
of app. Thu Apr 28, 2017 9:30 pm
