Family medicine has a history of collaboration with surgeons, and understanding the benefits of integrated care between the disciplines, including social determinants of health, has been identified as a priority in the academic family medicine community. Teamwork is recognized as an essential skill for the delivery of high-quality patient care and to promote interprofessional education for the benefit of patients. A retrospective review of an existing interprofessional team teaching event designed to facilitate the teamwork skills of family medicine residents was conducted. Surveys were given at the event, and a series of interviews were conducted with the participants. Questions were related to the teaching of teamwork skills, event design, faculty delivery of the skills, feedback to participants on delivering the skills, and the impact of the teaching on participants. The most common challenges identified were teaching the skills of time management and scheduling, as well as time-sensitive referrals to other specialties, and the time to deliver these skills. Challenges related to resident training were also identified. Findings from the surveys and interviews corroborated the importance of teamwork skills training for family medicine residents. The delivery of the teaching was considered optimal, especially by residents who had not previously received this training. The survey indicated that the team teaching event was one of the most important learning experiences for the residents./* * Copyright 2018 Red Hat, Inc. and/or its affiliates. * * Licensed 77a5ca646e

I have been trying to do some research for a week now and I have been making no progress with it. I am a newbie and was wondering if it was possible to look into the last time a previous user entered a value into a SQLite database for a column. For example, I have the following code. The name and the last_entry columns are the ones that I need to find out. This code will be in the onCreate() or onUpgrade() methods of the database. For some reason, the last_entry is 0 even though the last time a user entered a value into that column was a day ago. Could someone help me with this? public class DatabaseHelper extends SQLiteOpenHelper { private static final String TAG = "DatabaseHelper"; public DatabaseHelper(Context context) { super(context, "studentinformation.db", null, 1); } @Override public void onCreate(SQLiteDatabase db) { try { db.execSQL("CREATE TABLE IF NOT EXISTS `students` (`name` TEXT,`last_entry` TEXT)"); } catch (SQLException e) { Log.d(TAG, "onCreate Exception: " + e); } } @Override public void onUpgrade(SQLiteDatabase db, int old

PDF to TIFF CONVERTER is a program with a title that pretty much explains its functionality - it allows you to transform PDF documents into TIFF images. The tool can be easily used by novices and experienced individuals alike. The interface of the software is based on a standard window in which you can import PDF files via the file browser, treeview or "drag and drop" method. Batch processing is allowed. In the list you can read the source path and password status of each document. Once you specify the destination folder, you can go ahead and initiate conversion. But you can also configure settings when it comes to the compression level, page orientation and resolution, color mode, quality, dithering, rotation and stripping mode. Furthermore, you can set the page range and output filename template, resize images and enable PDF to TIFF CONVERTER to preserve the aspect ratio, as well as set post-task actions (e.g. delete or move original PDFs). The PDF conversion software quickly finishes a task while using a very low amount of system resources. It includes a brief help file, has a good response time, delivers a fair output quality regarding images, shapes and the text layout, and didn't freeze, crash or pop up errors during our tests. Even if PDF to TIFF CONVERTER comes with a simplistic appearance, we strongly recommend this tool to all users. … X-Pdf to PPT to PDF Converter 1.0.0.0 X-Pdf to PPT to PDF Converter is an excellent utility that makes it easy to convert PDF to PPT files and PPT to PDF.
