CAD The term CAD or CAD application" refers to both computer-aided design (CAD) and drafting, for example as used in the fields of computer-aided design and computer-aided engineering. CAD software is used to create a model or representation of a design, which can be manipulated by a designer, and may be shared or viewed by others. In the context of computer-aided design, a CAD software program may be classified as a modeling or a drafting program. Computer-aided design (CAD) software is used to design objects on a computer.

CAD software packages may be used to create models or representations of a design, such as a house or a car. CAD software packages allow the designer to manipulate and view the model. While a particular CAD program may be used for modeling a single design object, other CAD programs may be used for a wide variety of uses such as modeling a building, industrial design, and drafting of a map. The ruling, which is temporary, won't affect the administration's broader plan to phase out the Obama-era Deferred Action for Childhood Arrivals program. But it does give the administration a new avenue of attack against the program, which shields from deportation about 800,000 immigrants who arrived in the U.S. as children. It is the court's first action on an immigration issue since Trump was sworn in as president. The justices did not issue a statement explaining their decision, but the temporary injunction could provide a window of relief for those immigrants. It blocks the Trump administration from stopping people who are outside the U.S. illegally from enrolling in the new health insurance marketplaces a1d647c40b

A new species of Polysoma (Diptera: Chloropidae) from the Gulf of Mexico. Polysoma audouin, a new species of the genus Polysoma Boisduval, 1835, is described based on five females collected from Cabo Catoche in the Mexican state of Campeche during the early phases of the die-off of the coral reef complex, El Coral de las Conchas. It was the first find of this fly from Mexican waters.Q: Removing duplicate lines from a list with overlapping duplicate lines in python I am very new to python and I have been trying to solve this problem for a few days now. So far I have been using the sort function to delete the duplicate lines, but I am not sure if there is a better way to approach this. My problem is as follows: I have a list of lists that looks like this: [['2010', '1', 1, 0, 0, 0], ['2010', '2', 1, 0, 0, 0], ['2010', '3', 1, 0, 0, 0], ['2010', '4', 0, 0, 0, 0], ['2010', '5', 1, 0, 0, 0], ['2010', '6', 0, 0, 0, 0], ['2010', '7', 1, 0, 0, 0], ['2010', '8', 0, 0, 0, 0], ['2010', '9', 1, 0, 0, 0], ['2010', '10', 0, 0, 0, 0], ['2010', '11', 1, 0, 0, 0], ['2010', '12', 0, 0, 0, 0], ['2010', '13', 1, 0, 0, 0], ['2010', '14', 0, 0, 0, 0], ['2010', '15', 1, 0, 0, 0], ['2010', '16', 0, 0,
