Once collected, the data is immediately analysed to place the player into any of the standard playing positions in FIFA. It then uses this data to simulate more accurate movements and reactions of each individual player. The technology has been developed in parallel with the football community, and at a pivotal stage where it could have failed in delivering a truly dynamic, human likeness experience, according to EA SPORTS FIFA World Cup creative director Philippe Pessis. "We're at a very interesting time in the evolution of football simulation and we're fortunate that we have this technology at the right time," explained Pessis. "The whole idea is that we make the whole sport more human in a very dynamic way. "Because we are so focused on development, this new-gen technology would have sat there for four or five years and it would have been forgotten. "We're at the beginning of a new era. I'm really excited by it, because the guys are working hard and we're always looking to improve our football simulation." The new features will be available for FIFA Ultimate Team and FIFA Mobile.

What are my download requirements? We strongly recommend the use of a broadband Internet connection (cable/DSL/fibre optic) with stable connection, but it is possible to play FIFA 22 offline. Do I need to update my existing FIFA to FIFA 22? Yes, the latest update to FIFA 19 has fixed minor bugs and improved the overall consistency. What's new and improved? Football is back. In FIFA 22, we return to our iconic ball with a renewed commitment to delivering a physical and responsive gameplay experience. From new ways to shoot at goal and complete passes, to intelligence on where players need to be in the build-up play and where they'll be moving when taking a shot, the most powerful game engine and gameplay innovations in FIFA history put the ball in your hands, and in your players' feet. It's our most immersive football ever. Take control of your favourite players and be a part of the action where you want. Whether you're roaming the entire pitch or, better yet, the entire stadium, explore the game at your own pace to experience a new level of player intelligence. Stay safe by avoiding collisions, but finish the job by slipping opponents, tripping over those in front of you and smashing into goalposts. A new FIFA season. In February, FIFA 21 returns with a fresh new take on what it means to be a FIFA player. The new FUT 22 Champions Cup Mode allows you to compete as your favourite club and battle it out with your global rivals. The new Transfer Market now allows you to re-sign and let go of your players at your whim. If you want to fire your keeper, or sign the next Cristiano Ronaldo, you can now. FIFA is back in new ways with fundamental gameplay improvements that expand across the entire game. Tackle better thanks to a new sliding system that is more responsive and allows you to close space quicker. Increased ball control with new finesse dribbling and a new short-passing system that helps you play your game, not the other way around. Quicker, tighter and more precise tackling. New techniques for headers, and more. We've made the news, the pitch, the fans, the players and the stadium all come alive. The shot animation on every goal, aerial passes, volleys, spinners, through balls and more have been improved. Last-ditch tackles now more reliable. bc9d6d6daa
