follow the instructions here. The description says it supports PNG, BMP, PNG-24, JPEG, GIF, TIFF and PSD. Can that be changed to include other formats? Also, a setting to optimize for smaller file size for PNG and GIF would be handy (the setting for JPEG and BMP is fine). Also, with the zip file, I see that there are three directories: "PNG optimized", "BMP optimized" and "JPEG optimized". What is the difference between each one and how can they be changed? Thanks! I downloaded this tool. It works fine for me. Actually, I did have some issues setting up the original program on my machine that I didn't have before. However, JPEGCompress now works very well on my machine. I usually have about 200-500 images to compress and I found this program very easy to use and effective. I recommend it. Posted by Rand on 22/08/2014 Was this helpful? Very easy to use, I would suggest that the version 4 should provide options to reduce png compression as that is the most common file type. I am quite happy with the results. Posted by Ali Gh of Saudi Arabia on 05/07/2013 Was this helpful? Wasn't able to install the program on windows 7 and i also had issues with the link to the program Posted by Unknown on 22/06/2013 Was this helpful? Looks interesting. Posted by Unknown on 22/06/2013 Was this helpful? Error when try to run it. No pictures to work with. Posted by Unknown on 22/06/2013 Was this helpful? Thank you for this but when i try to run the program a window is open and when i close it nothing is change. Posted by Unknown on 22/06/2013 Was this helpful?
