Autodesk Design Review 2013 x64 x32 Crack.Q: Android DownloadImageFromURL I have simple problem with ImageDownloader. I need that part of my application will have to download the picture from my server. And on some condition (may be a result of an "onclick" action on a button) I need to clear the cache of this image. I tried the following code and it works, but it seems as workaround rather than solution. And I think that there is a better way...

```
public void pullImage() { final String url = ""; ImageDownloader.download(url, new ImageDownloader.OnImageDownloaded() { @Override public void onImageDownloaded(String url, Bitmap bitmap) { MyActivity.this.imageView.setImageBitmap(bitmap); //On some condition, I need to clear the cache //How to do it?
```
