---

downloading files and your kids are. in YouTube, you can drop the quality from 1080p HD (maximum) to 720p HD, .The present invention relates to a method of providing individual and sequential placement of paint and/or other coatings on a plurality of fastener elements, such as nuts, bolts and other threaded devices. A unique and improved system is described for applying dry paint or other coatings, such as lubricants, to the exterior surfaces of such fastener elements as the fasteners are threaded into a threaded aperture in a workpiece. Once the threaded fastener is fully threaded into the aperture in the workpiece, the paint or other coating is painted onto the threaded exterior surface of the threaded fastener element to provide a stronger and longer lasting joint. The system is a simple method of quickly and efficiently providing an enhanced wear-resistant surface

---

on bolts and other threaded fasteners. The application of coatings or sealants to fastener elements or fastened parts is well known. In particular, the application of coatings to threaded fasteners to reduce friction during assembly of the workpiece or to increase the corrosion resistance of the joint is well known. U.S. Pat. No. 4,979,479 discloses a method of coating fastener parts including threaded fasteners. In particular, a coating composition consisting of epoxy, polyurethane and polymeric microspheres is applied to a threaded surface of a threaded
