SpectraLayers Pro 7 lets you record the sound created by your software, directly from the timeline. Remove audio artifacts such as noise, clicks and thumps, apply specialized metering and gain with precise tools, and process, mix and mix between completely independent audio stems in Cubase. SpectraLayers Pro 7 extends your creativity with new features that adapt to your audio tracks and make matching audio easier than ever. The best of SpectraLayers in one program! Stay productive with best-in-class tooling, speed and flexibility. SpectraLayers Pro 7, the most powerful, flexible and advanced spectral editing software in the industry, brings new stability and efficiency to audio editing. SpectraLayers is best in class for its powerful tools, performance and flexible workflow, and now includes the best automated tools available. Add additional audio tracks, choose from more than 100 spectral presets, and work intuitively through easy-to-use controls and beautiful, customizable interfaces. SpectraLayers Pro 7 includes best-in-class innovations, including a revised track structure that lets you import multiple audio sources and spectrally edit those audio sources independently. Updates to the audio track import provide many improvements, including better support for various media formats and streaming modes, user-defined time scaling to recover audio that has time-drifted, and the ability to load more than 32 audio streams at a time. SpectraLayers Pro 7 also takes the time to clean up the interface, including a completely new audio track navigation system and new controls for viewing spectral edits and automation. Sound can be precisely and intuitively edited and processed on the spectral display, then placed on a new or existing track in the audio timeline. SpectraLayers Pro 7 also offers various automated processes, including the new automatic noise reduction tool. 5ec8ef588b
